

ABHIGYAN GOSWAMI

abhigyangoswami0@gmail.com linkedin.com/in/abhigyan-goswami github.com/Gokuattacker

PROFESSIONAL SKILL

Languages: C++>JavaScript>Python> Java> SQL

Dev / Testing skills: Agile Development, Web Development, Pair Programming

Tools / Databases: Fast API, MongoDB, MySQL, NodeJS, Git, GitHub, Bash, JSON

CICD: Docker, GitHub Actions.

Soft Skills: Problem Skills, Teamwork and Collaboration, Adaptability, Time Management, Communication Skills

EDUCATION

Masters of Computer Applications (Aug'25-Present)

Manipal Institute of Technology, Manipal, India (CGPA-6.43/10.0)

Bachelors of Computer Applications (Aug'22 –May'25)

SRM Institute of Science and Technology, Chennai, India. (CGPA – 9.01/ 10.0)

Higher Secondary Education, CBSE (May'20 – Jul'22)

Maharishi Vidya Mandir Senior Secondary School, Assam, India. (70%)

PROFESSIONAL EXPERIENCE

Web Developer, Everlabs Freelance

(Nov''24 - January''25) (Remote)

- Developed **10+ responsive web pages** using **Next.js and React**, delivering consistent UI across desktop and mobile devices.
- Integrated **10+ REST APIs** using **Axios**, streamlining data fetching, error handling, and state synchronization.
- Implemented **Redux** for centralized state management, improving application scalability and maintainability.
- Integrated **Fitbit API** with **Supabase** for real-time activity tracking, authentication, and secure token management.
- Optimized application performance using **SSR, ISR, and dynamic routing**, improving page loading and overall responsiveness.
- Collaborated with developers to debug **20+ frontend issues**, improving application stability and user experience.

PROJECTS

CodeTeach – a coding platform:

- 1)Developed a full-stack coding platform using Next.js, React, TypeScript, FastAPI, and PostgreSQL, supporting 4 programming languages and interactive code execution.
- 2)Integrated Monaco Editor and Judge0 CE to enable real-time code execution, automated test-case evaluation, and runtime/output analysis.
- 3)Engineered a secure execution sandbox with 5-second timeouts, process isolation, dynamic test-case injection, and local fallback execution.
- 4)Built 10+ REST APIs for authentication, problem management, and submissions using FastAPI, SQLAlchemy, Pydantic, and JWT.
- 5)Implemented JWT-based authentication and Edge Middleware route protection, reducing unnecessary authentication/database requests.
- 6)Designed database models and Alembic migrations for 3 core entities—Users, Problems, and Submissions—with PostgreSQL/SQLite support.

Quiz Platform System:

- 1)Developed a full-stack quiz platform supporting timed quiz sessions and 100+ concurrent participants, delivering seamless quiz selection, submission, and result retrieval.
- 2) Implemented RESTful APIs using Node.js, Express.js, and MongoDB, enabling automated answer evaluation and reducing quiz processing time by 70%.
- 3) Leveraged Redis for session management, duplicate submission prevention, and real-time leaderboard updates, improving response times by 60% over database-only operations.
- 4) Designed scalable MongoDB schemas and seeded 500+ quiz questions, ensuring efficient data retrieval and simplified content management.
- 5) Engineered an automated scoring and leaderboard system, providing instant result generation and ranked score tracking while ensuring fair participation through backend validation.

GoFarm Agriculture Predictive Analytics Web App:

- 1) Developed a React.js & FastAPI web app, improving UX and accessibility for 1,000+ users.
- 2) Optimized API communication with Axios, reducing data fetch time by 40% and increasing response efficiency.
- 3) Built a FastAPI backend, processing 1,000+ API requests/day with low-latency responses.
- 4)Implemented Pydantic validation, reducing input errors by 30% and improving data integrity.
- 5)Processed & analyzed 500MB+ datasets using Pandas, optimizing computation speed by 35%.
